Williams®

Bullish on the industry

...with a whole new portfolio

It all began in 1981 with DEFENDER. Williams' first entry in the video category took the industry by storm and, by the end of the yeer, the award for the highest earning game as well.

Then came STARGATE and ROBOTRON: 2084. The next generation of technology, sophistication and pley. Proven winners, they're still earning strong, still available and still in production after months of acclaim by distributors, operators and players alike.

# of video games!

Now there's a hot, new offering in the Williams portfolio with financial reports from test locations that key it as a superb investment opportunity. MOON PATROL. Paying big dividends in cashboxes everywhere.

The Williams portfolio of video games. Profitable, reliable, bullish on the industry.
